

## Mental Well-Being Information and Resources

### Ways to Support Our Children and Caring Adults

This may be a stressful and frightening time for our children. Fear and worry are normal for children of all ages. But there are things we can do to manage stress and support our children during these extraordinary times.

During a pandemic, like all of us, children may experience a range of emotions. You may observe they appear anxious, preoccupied, or tired, and/or you may notice a range of physical complaints.

#### Reactions will vary according to:

- children's development stage;
- level of awareness about the pandemic;
- exposure to accurate information about the pandemic;
- physical or emotional proximity to the outbreak;
- health status of child and/or loved ones;
- mental health status of child and/or loved ones; and
- prior experience with traumatic circumstances.

#### Some Common Reactions

- Anxiety
- Worry about self or loved ones
- Difficulty focusing on school
- Preoccupation with illness
- Need for reassurance
- Fatigue
- Stomach aches, headaches, etc.

As caring adults in children's lives, we can help by being a steady calming influence, providing developmentally-appropriate and factual information about the local situation, and helping them to feel some level of control. Being part of the solution, by thoroughly washing hands, physical distancing, and good etiquette when coughing or sneezing can help them to feel a sense of control in an uncertain situation.

#### Focus on the solutions

When talking to our children, a solutions-focused approach is most helpful:

- Many things are being done to help the current situation (governments, doctors, nurses, schools, ...)*
- It will get better*
- Life will return to normal*
- Let's focus on caring for our family and friends*

#### Ways to support all children:

##### Routines.

Routines can help create a sense of predictability and security. Maintain normal, predictable routines as much as possible. Some examples include scheduling daily academic time, outdoor activities, chores around the house and family time.

### Stay Calm.

Have calm, age-appropriate, fact-based discussions. Remind children that you are taking precautions like hand-washing and physical distancing to stay safe. Listen well, validate feelings and let them know you have heard their concerns.

### Focus on the positive.

Help children change their outlook from 'we are stuck inside' to 'we have time to focus on other things like family and home' – help them to notice opportunities. Model compassion, positive coping and self-care skills.

### Nutrition.

Eat healthy meals and consider using this time to learn how to prepare healthy food together.

### Sleep.

Make sure children are still getting enough sleep. [www.sleepfoundation.org](http://www.sleepfoundation.org)

### Play.

Spend more time together, enjoy quiet times to read, listen to music, do puzzles and play games - increase play time – both inside and out

### Digital Breaks.

For older children, encourage breaks from the news and social media. If you do watch the news, watch it together to provide an opportunity for conversation and help to keep things in perspective.

### **Personal Resiliency Tips for Adults:**

It's essential to take care of yourself, not just for your well-being, but also for those you care about and support. Your self-care will help improve your energy, focus, ability to cope with challenges and overall life experience. And you're modelling wellness strategies for the children and youth in your life.

- Nourish Yourself** – Take time to eat and hydrate adequately.
- Stay Active** - Physical activity increases your energy, enhances your immune system, reduces insomnia, stimulates brain growth, and even acts as an antidepressant.
- Sleep Well** - Getting enough sleep also helps you cope with the stresses of everyday life (7-9hrs per night).
- Stay Connected** - Supportive relationships are one of the most powerful influences on our sense of wellness.
- Pause** - Make sure to take time for yourself during the day with an activity that can help you feel restored.
- Reflect** - Be mindful of your thoughts and feelings, both positive and negative, as part of your self-care – focus on what is meaningful for you.
- Be Gentle** - Pay attention to how you talk to yourself. Treat yourself with compassion and gentleness, we are all doing our best.

- **Be Committed** - Commit to your self-care. Persist with this, even when life gets busy. Especially when life gets busy.

Your child may be experiencing a variety of emotions during challenging times. Mental health can move along a spectrum through mental well-being to mental illness. As a caring adult, it is important to monitor and check in with children and watch for changes in their emotions, mood and behaviour. Changes can signal a need for additional support and/or resources. Below is a list of different supports available to caring adults and children and linkages to direct service if a crisis arises.

### Immediate Help

- [Kids Help Phone](#): Reach a counsellor 24/7 at 1-800-668-6868 (support in French or English), text CONNECT to 686868 (24/7), or [live chat](#) via the website (9:00pm – 4:00am).
- Mental Health Crisis Line: toll-free 1-800-784-2433 or (604) 872-3311 (Greater Vancouver), 24/7 confidential, non-judgmental free emotional support for people experiencing feelings of distress or despair, including thoughts of suicide - available in 140 languages.
